

PILNO TOPOGRĀFISKO KARŠU M 1: 10 000 SAGATAVOŠANA

HOW TO READ THE INDEX USING SAMPLE SHEET 4433-15

Step #1: Choose the number in the blue circle for the rectangle that covers your area. For our example this would be 44.

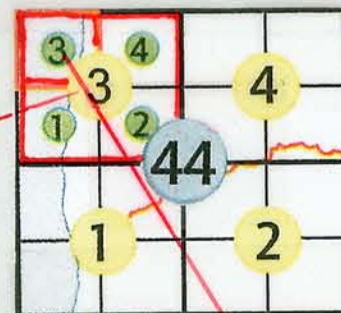

These rectangles are divided into four main quadrants each numbered directionally:

- 1 = SW
- 2 = SE
- 3 = NW
- 4 = NE

Choose the number that covers your area, represented in the example in yellow numbered circles.

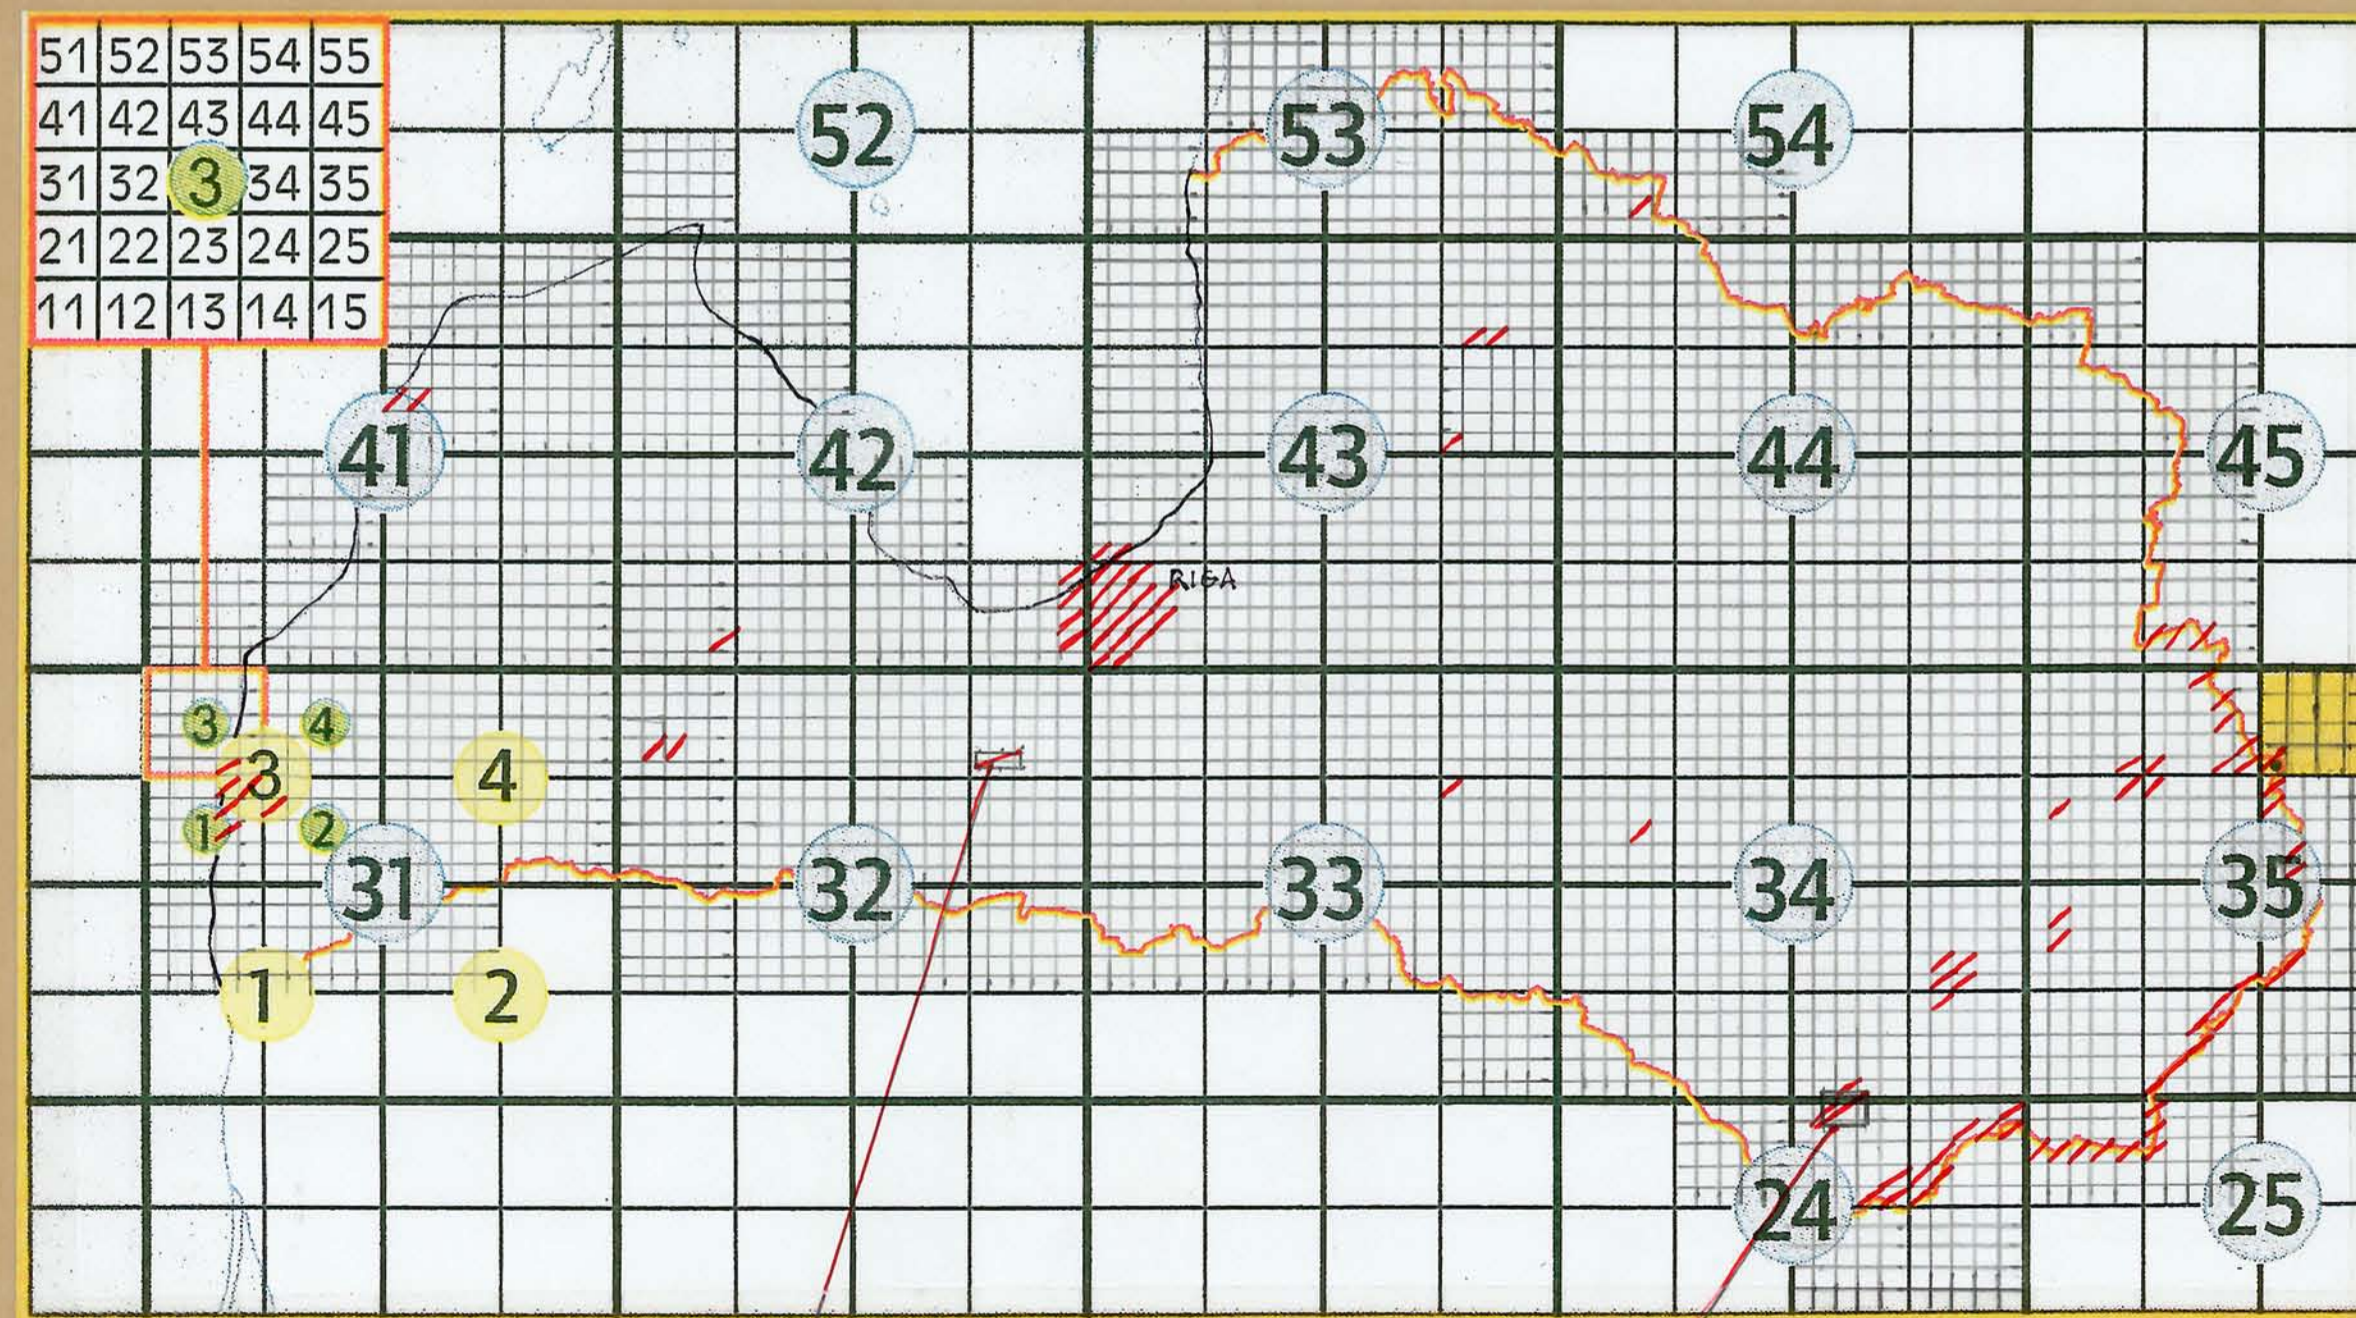

Our sheet is 3. (Our number is now 443.)

Step #3: Within that quadrant are 4 more squares numbered in the same directional sequence represented in this example as the green numbered circles. Now you have the base 4-digit number: 4433.

The last digit's square is then divided into 25 squares in numbered rows: 11-15; 21-25; 31-35; 41-45; 51-55.

Step #4: Choose the small square that covers your area. This represents the last part of the map number: 4433-15
