

HOW TO READ THE INDEX USING SAMPLE SHEET 4433-15

Step #1: Choose the number in the blue circle for the rectangle that covers your area. For our example this would be **44**.

These rectangles are divided into four main quadrants each numbered directionally:

- 1 = SW
- 2 = SE
- 3 = NW
- 4 = NE

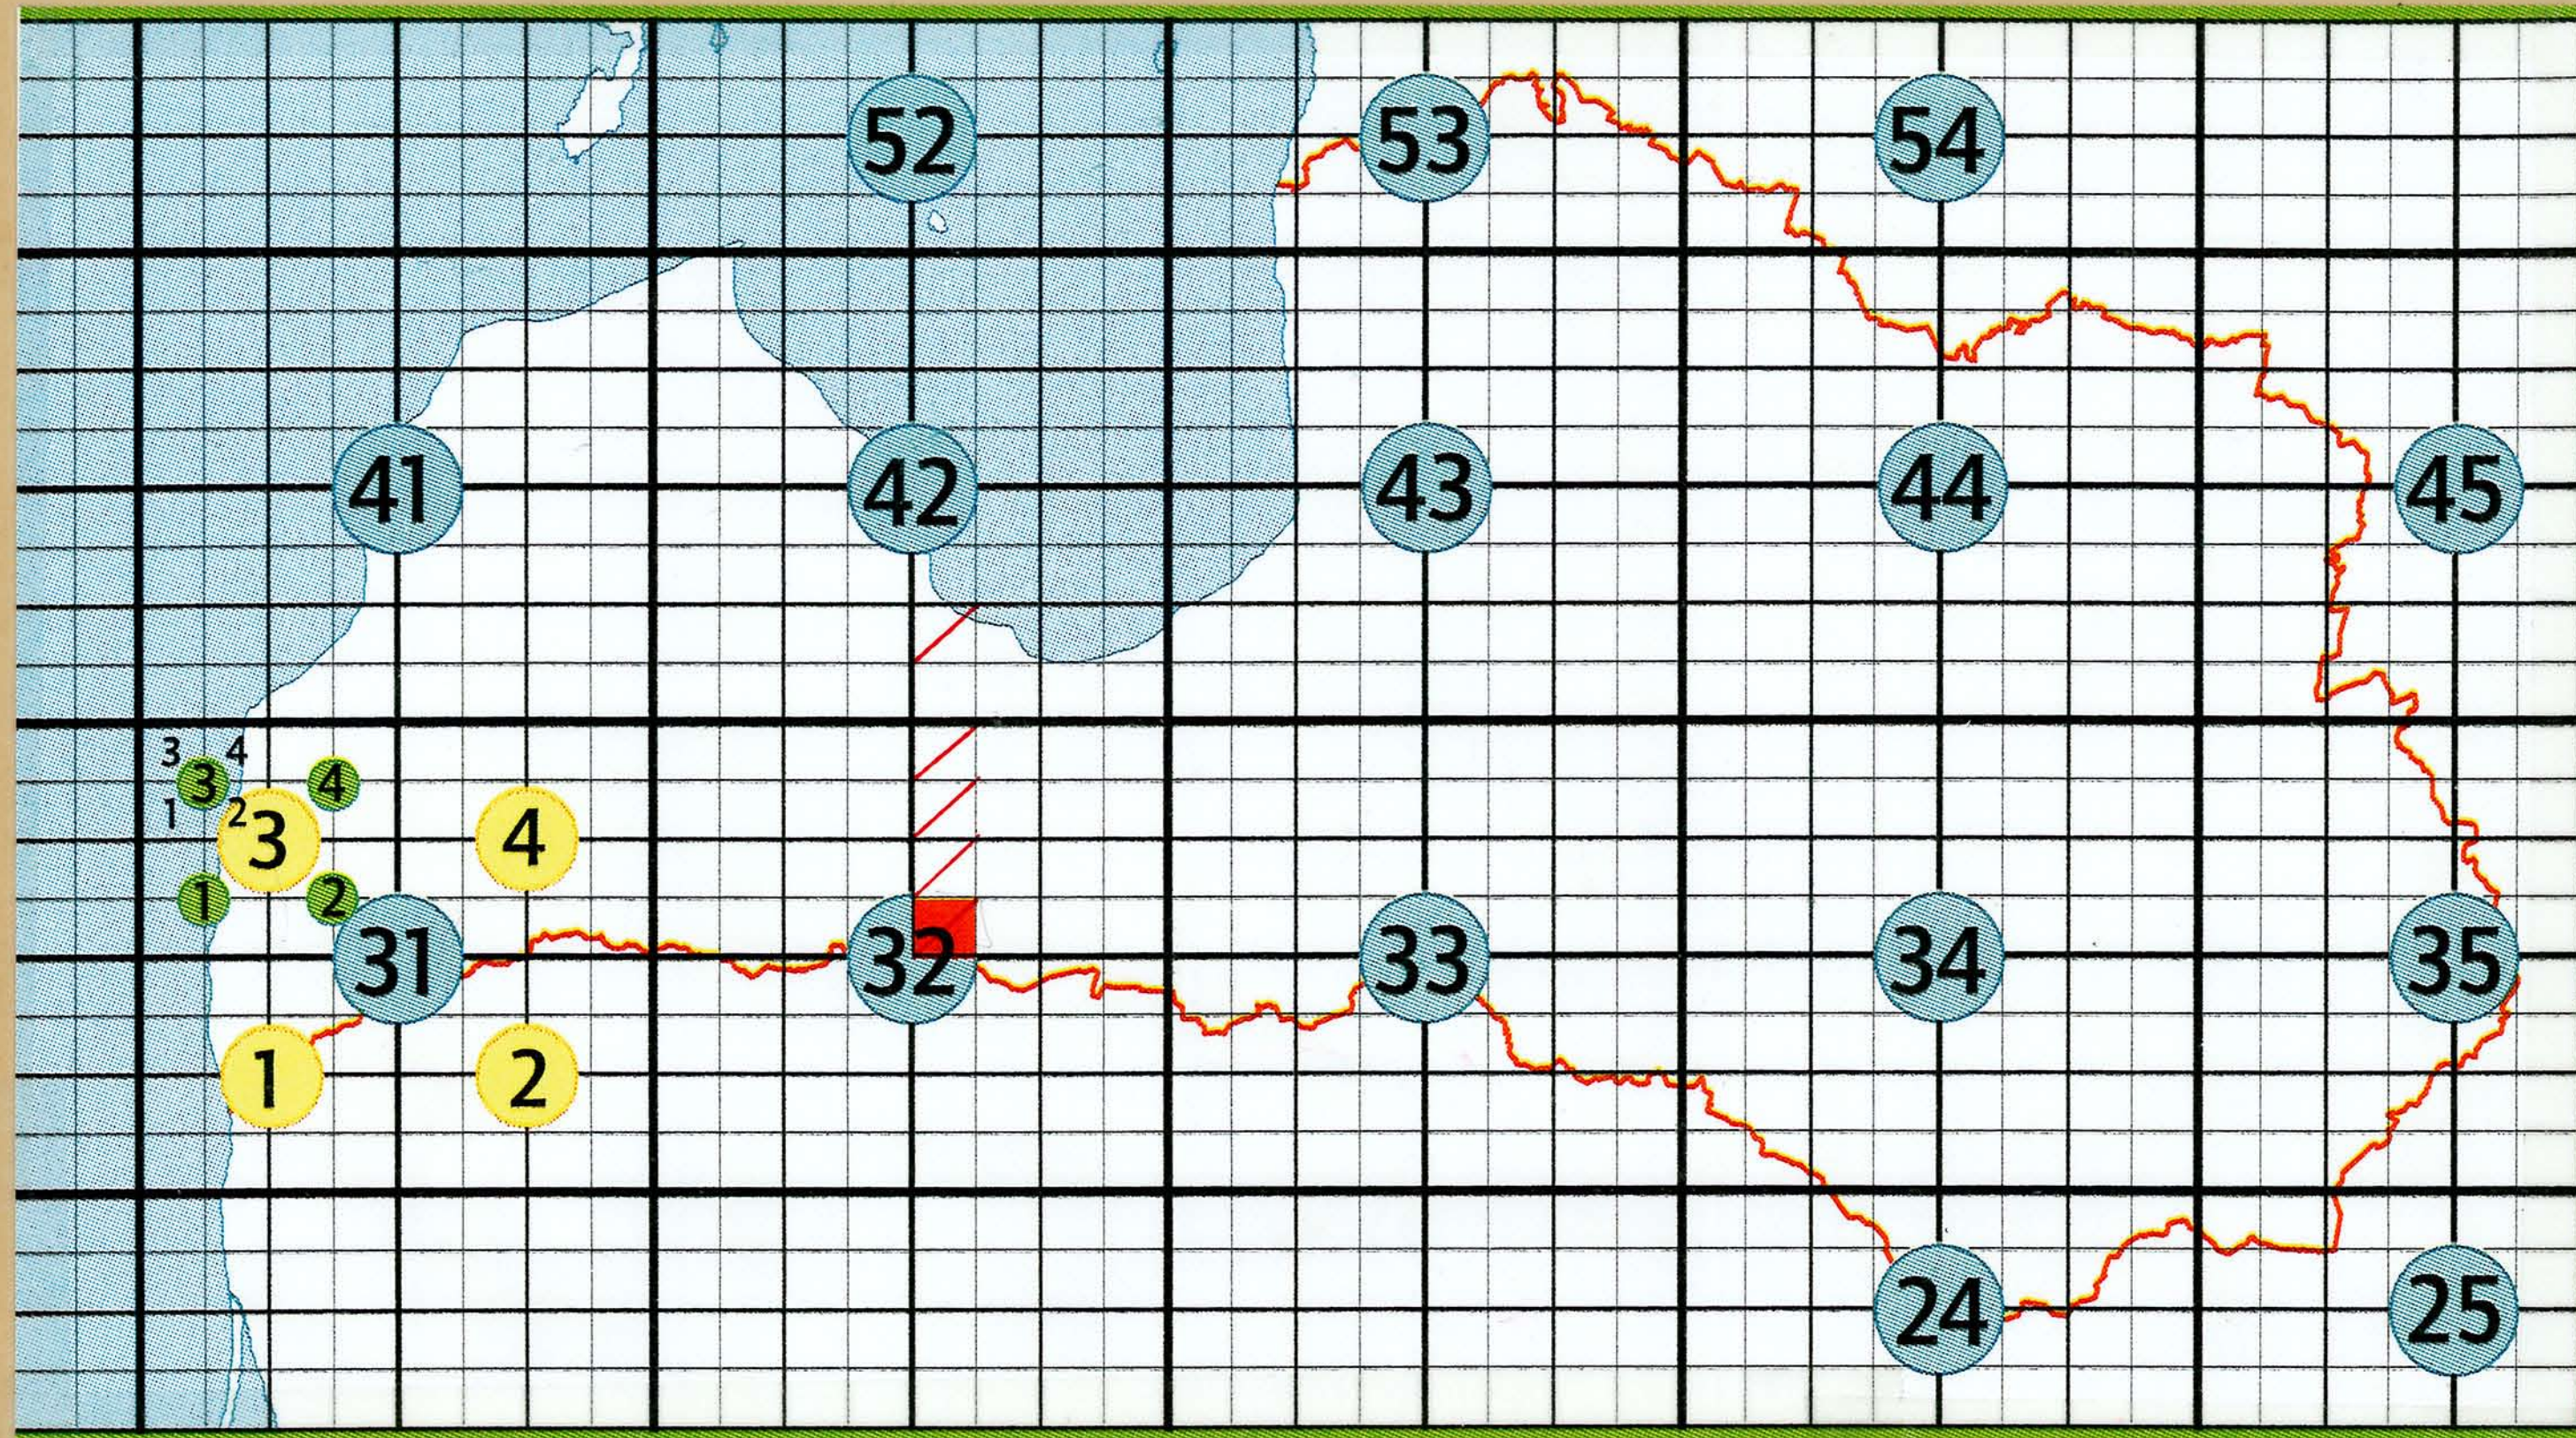

Choose the number that covers your area, represented in the example in yellow numbered circles.

Our sheet is 3. (Our number is now **443**).

Step #3: Within that quadrant are 4 more squares numbered in the same directional sequence represented in this example as the green numbered circles. Now you have the base 4-digit number: **4433**.

The last digit's square is then divided into 4 numbered squares: 1, 2, 3, or 4.

Step #4: Choose the small square that covers your area. This represents the last part of the map number: **4433-1**
