

HOW TO READ THE INDEX  
USING SAMPLE SHEET  
4531

Step #1: Choose the number in the blue circle for the rectangle that covers your area. For our example this would be 45.

These rectangles are divided into four main quadrants each numbered directionally:

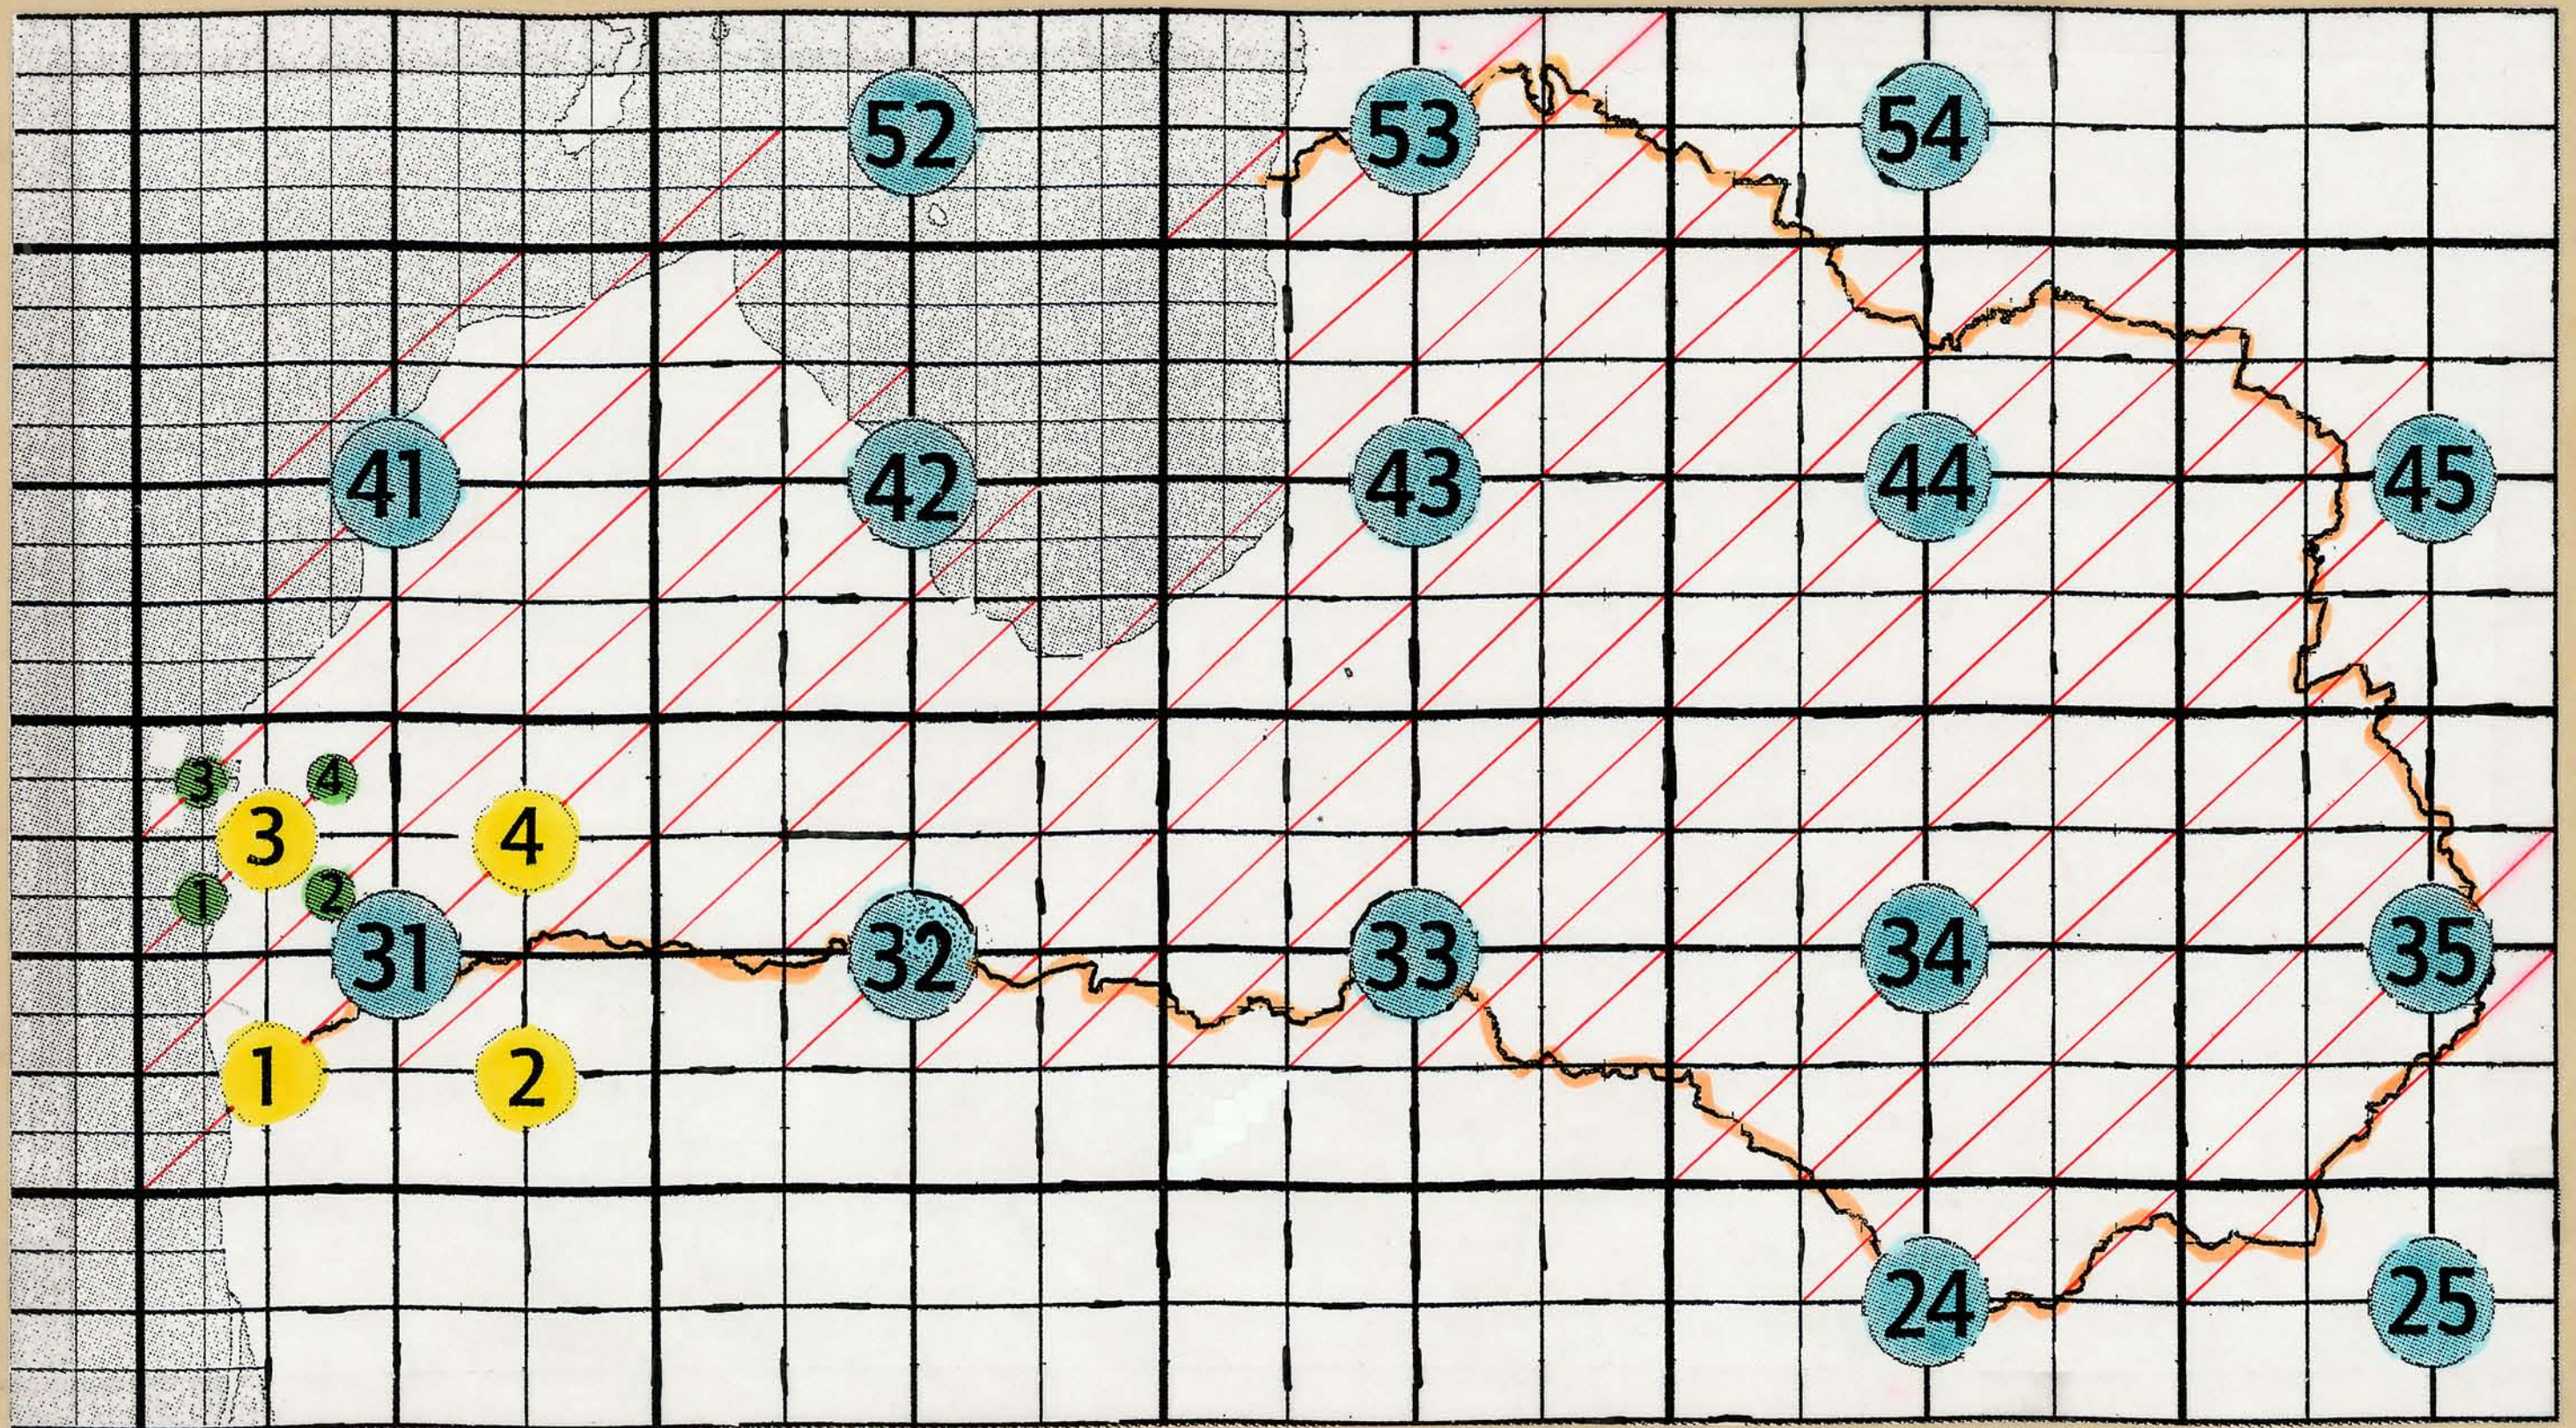

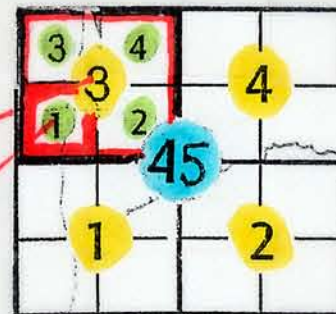

- 1 = SW
- 2 = SE
- 3 = NW
- 4 = NE

Step #2: Choose the number that covers your area, represented in the example in yellow numbered circles.

Our sheet is 3. (Our number is now 453).

Step #3: Within that quadrant are 4 more squares. Numbered in the same directional sequence represented in this example as the green numbered circles.

Now you have the 4-digit number: 4531.
